Solution For Complexity

About QuiqRP

QuiqRP Solutions Pvt. Ltd., is a software development company based in Mysore and established in 2013 with decades of industrial experience and knowledge of International standards like ISO 9000:2008, TS 16949:2009, AS 9100:2009 etc., The Brand Name "**QuiqRP**" Stands for Quick Resource Planning in any organization.

QuiqRP is well equipped with all standard techniques and modern technologies for software development. We do offer the best solutions for all business needs with excellent functionality, features and user friendly interfaces. "*Call it complete business automation to make paperless office.*"

QuiqRP is having a team of experienced & innovative software engineers, Architects, developers & testers to accommodate needs of all kinds of software solutions that organization require for their businesses.

QuiqRP is committed to develop quality and unique software solutions where there will be exceptional performance, no duplications of data, and value in all software products and web services without sacrificing quality and on time delivery.

About Universal ERP

QuiqRP provides complete IT solutions in the field of Desktop Applications, Web Applications and Web Services. **QuiqRP** has developed ERP software under the brand name "**Universal ERP**" focusing on small and medium scale industries.

Universal ERP caters to the need of multiple industry segments viz., Manufacturing, Process, Service, Power, Trading etc.

The various versions of Universal ERP are...

- Universal ERP (Standard)
- Universal ERP (Professional)
- Universal ERP (Ultimate)

& are available in all industry segments

Dreams made real...

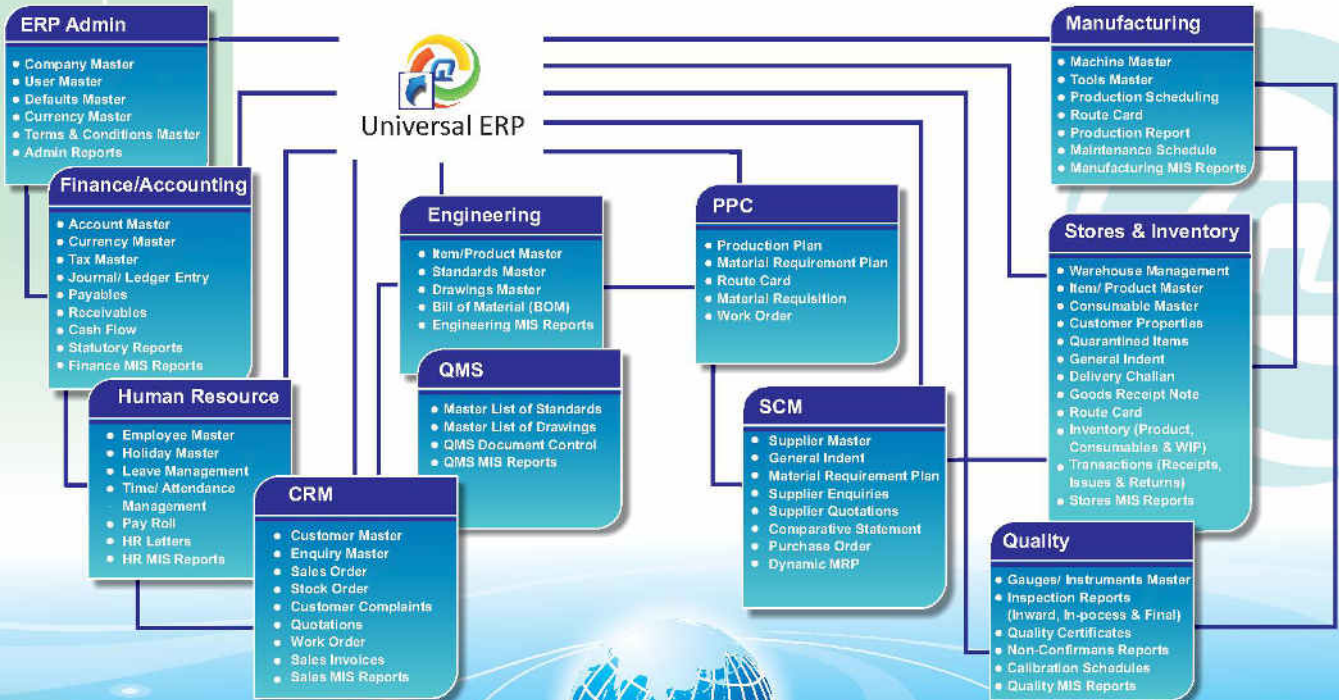

In the current market scenario ERP software became a dream for small and medium scaled industries due to the challenges like *High Implementation Cost, Hidden Costs on supports & services, Complex Working Environment, Need of special training, Failure in utilization of resources through ERP etc.*

Universal ERP comes up with affordable cost compared to any ERP package in the market & dedicated team for customer support.

Universal ERP is designed with user friendly interface which reduces the complexity in working environment & eliminates special training requirement for ERP operators.

Universal ERP offers most of the business modules by which any organization can aim to achieve maximum profit by utilizing resources like Manpower, Materials, Machines, Infrastructure and Technologies in the best optimized manner.

Custom Software Development

Apart from our branded versions, **QuiqRP** undertakes customized software development based on customer requirements.

QuiqRP follows an "Iterative model" software development life cycle to ensure success in the process of software development process. The phases in this life cycle model are represented in the diagram...
